VIKING INDUSTRIER

ECOLOGICAL DRY TOILET Ø1.2 M

PRODUCT DESCRIPTION

This discreet eco-friendly toilet complements any scenery. Rustic looking, easy to use and maintain, this toilet is not harmful to the environment. A dry compost toilet requires no water, no digging of holes and no chemicals.

The roof of the toilet is covered with bitumen shingles, that can be customized (3 colours: black, green, red). Inside of the toilet there is a wooden box with the place for a toilet and the other section for a bucket with sawdust (openable). If required, the exterior of the toilet can be painted with the colour of choice.

PAINTING

AUTOMATIC MACHINE SPRAY TECHNOLOGY
Benefits

One of the main and most obvious benefits of using a paint machine is the speed and flexibility at which we can suggest our painting service for all of our products. A spray paint machine can get the work done faster and more consistently than manually painting. While the machine works faster, it improves quality too – sprayers produce an even coat of paint, leaving a high-quality finish.
With our painting service from now, we can suggest to our client maximum flexibility! Not assembled products such as Grill cabins, Pavilions, Camping pods, and other products of any size you can order painted too!

PROFESSIONAL SPRAY

The high-quality preservative finish is professionally spray applied in the factory to three sides of the wood. The product is treated in your choice of color. You can choose two colors for one product: one for almost all product details and another for finishing details.

STAIN | PAINT
Which type of paint should I Use?

Properly painting and impregnating is one of the most important things to consider when thinking about how to extend your product's lifetime.
Paint and natural wood finish instantly spruce up the aesthetics of your product.
The decision you will need to make is if you want to use a water-based wood stain or paint. Both will offer you UV protection. The wood stains will allow the texture of the
wood to show through and many are now available in a vast range of colors, however, paints will give you an intensive color, but will cover the grain and texture of the wood.
